

ONIRIM

1 – 2 Players | 15 minutes | Solo or Coop

SET-UP

- Shuffle the 76 cards from the Basic game.
- Draw until you have 5 **Location** cards in hand.
- If you draw any **Door** or **Dream** cards, set them aside until 5 Location cards are drawn, then reshuffle them back into the deck.

GAME TURN PHASES

1. Play or Discard a card

- Play a card
 - *The card played may not have a symbol similar to the previously played card.*
 - *If the card just played is the third of the same color in the row, you **Gain** a Door of that color:*
 - Search and obtain that Door in the deck.
 - Shuffle the deck.
- Discard a card
 - Discard a **Moon** or **Sun**, go to phase 2.
 - Discard a **Key** to perform a **Prophecy**:
 - Look at the top 5 cards of the deck.
 - Discard one of these cards.
 - Put the rest back on the top of the deck in your chosen order.

2. Fill your hand

Replenish your hand back to 5 cards:

- Location card - *Nothing happens.*
- Door card - *Place in the Limbo pile. You may discard a **Key** card of the same color from hand to gain the Door card.*
- Dream card (**Nightmare**) - *Resolve immediately then discard. Choose 1 option to resolve:*
 - Discard a Key card from hand.
 - Place an obtained Door in Limbo Pile.
 - Discard the 5 top cards of deck. Dream and Door cards go to Limbo pile.
 - Discard your hand, and draw 5 cards, as in the set-up.

3. Shuffle the Limbo pile into the deck

VICTORY

Discover all 8 Doors.

DEFEAT

Deck runs out of cards.

2-PLAYER GAME SET-UP

- Shuffle the 76 cards from the Basic game.
- Draw until you have 8 Location cards on the table.
- If you draw any Door or Dream cards, set them aside and reshuffle them back into the deck after 8 Location cards are drawn.
- Each player takes 3 cards and 2 cards are left in the table to be shared.

DIFFERENCES FROM SOLO GAME

- Players discarding cards can discard from the 3 cards in hand, or from the 2 shared cards.
- Active player can also, **in addition to** discarding a card, exchange a card from his hand with one of the 2 shared cards.
- When discarding whole hand (due to Nightmare), the player discards his hand and the 2 shared cards.
- When refilling hands, players refill both hand (to 3 cards) and shared cards (to 2 cards).

VICTORY IN 2-PLAYER GAME

Each Player must gain 1 Door of each color.

THE BOOK OF STEPS LOST AND FOUND

SET-UP

- Shuffle the 76 cards from the Basic game.
- Shuffle the 8 **Goal** cards and place them face down in one row. Reveal the cards.
- ★ Choose a side/difficulty on the **Spells** card.

VICTORY

Obtain the Door cards in the order shown by the 8 Goal cards.

CHANGES TO BASIC GAME

- If you obtain a Door card that doesn't match the first face-up Goal card, put the Door card in the Limbo pile instead.
- At any time you can use the **Spells** card. Pay the cost by removing **x (y)** cards from discard pile:
 - **Paradoxical Prophecy 5 (6)**
Look the 5 bottom cards in the deck, place 1 on top and the other 4 on the bottom of the deck, in the order of your choice.
 - **Parallel Planning 7 (9)**
Swap 2 Goal cards. Those cards do not have to be adjacent.
 - **Powerful Punishment 10 (12)**
Discard a Nightmare card just drawn without having to apply its effect.

THE GLYPHS

SET-UP

- Shuffle the 8 **Glyph** cards and the 4 Door cards of this expansion in the deck.
 - *When playing with "The Book of Steps Lost and Found" expansion, shuffle the 4 Goal cards with the 8 Goal cards of the other expansion, and reveal those 12 cards in a row.*

VICTORY

Obtain the 4 Door cards of this expansion along with the 8 Door cards of the Basic game.

CHANGES TO BASIC GAME

- The **Glyph** cards are Location cards.
- All rules that apply to Location cards apply to the Glyph cards.
- A Glyph card can be played as part of a series of 3 cards of the same color in order to get a Door card from the deck.
- If you decide to discard a Glyph card from your hand (in phase 1, "Play or discard a card"), you trigger an **Incantation**:
 - *Reveal the top 5 cards of the deck.*
 - *If there is at least 1 Door card among those 5 cards, put 1 of those Door cards on the table.*
 - *Put remaining 4 cards on the bottom of the deck in the order of your choice.*
 - *The color of the Door and the color of the discarded Glyph card do not need to be the same.*
 - *If there is no Door card among those 5 cards, put them all on the bottom of the deck in the order of your choice.*

THE DREAMCATCHERS

SET-UP

- Shuffle the 4 **Lost Dream** cards in the deck.
- Display the 4 **Dreamcatcher** cards and 2 **Failsafe Book** cards on the table.

VICTORY

Obtain the 4 Lost Dreams, placed next to one or several Dreamcatcher cards.

Obtain the 8 Door cards of the Basic game.

CHANGES TO BASIC GAME

- A **Lost Dream** card is a Dream card.
- At the end of a turn, if there are one or more cards in the Limbo pile, put them **all** next to one free Dreamcatcher card.
- If there is no free Dreamcatcher card, Dreamcatchers are **overloaded**:
 - *Remove one Dreamcatcher card from the game and the attached cards are placed in Limbo pile.*
 - *Shuffle Limbo pile back into the deck.*
- Once all Dreamcatcher cards are removed, game is lost.
- Overload can be avoided by **freeing** a Dreamcatcher card. Shuffle attached cards back into the deck:
 - *Can be triggered by any effect that forces reshuffling the deck.*
 - *At the beginning of turn, remove one Failsafe book card from game.*
- If a card **search** is triggered, **choose 1 option**:
 - *Take a copy attached to a Dreamcatcher.*
 - *Search the deck, trigger **freeing** by shuffling after the search.*
 - *Search deck, not find the card, trigger **freeing**, then take a copy attached to a Dreamcatcher.*
- Ignore Dreamcatchers on set-up card draw.
- ★ Remove Failsafe Book cards during set-up for a more difficult game.

THE TOWERS

SET-UP

Shuffle the 12 **Tower** cards into the deck.

VICTORY

Obtain the 8 Door cards from the Basic game.

Complete a row of 4 Tower cards, one of each color.

- *You are permitted to have two Tower cards of the same color in your Alignment, as long as the 4 Tower cards of different colors are next to each other.*

CHANGES TO BASIC GAME

Towers are Location cards, but have unique features, unlike other Location cards:

- *They are **not** played in the labyrinth row, but in an additional row made up of Tower cards only.*
- *A Tower card may only be played next to another Tower card if the two do not share any symbols on adjacent sides.*
- *When you discard a Tower, look at the top 3, 4 or 5 cards of the deck (according to number on bottom of the Tower card); then put them all back on the top of the deck in the order of your choice.*
- *After drawing and resolving a Nightmare card, you **MUST** also discard a Tower card from the row. You choose the one you want to discard – you may even discard a Tower card placed between two other Tower cards – but only if the remaining cards may connect without violating the abovementioned rule.*
- *If you draw a Nightmare card but do not want to discard a Tower card, you may resolve the Nightmare effect as usual then place the*

Nightmare card into the Limbo pile, instead of discarding it.

- After gaining 4 Tower cards, one of each color, they are no longer affected by the Nightmares.
- ★ Ignore above rule for a more difficult game.

HAPPY DREAMS AND DARK PREMONITIONS

SET-UP

- Shuffle the 4 **Happy Dream** cards in the deck.
- Shuffle the 8 **Dark Premonition** cards and reveal 4 face up on the table.

CHANGES TO BASIC GAME

- A **Dark Premonition** card depicts the trigger condition and the penalty.
- When the trigger condition is fulfilled, you immediately apply the penalty; this Dark Premonition card is then removed from the game:
 - **2 red Door cards on the table**
Take all red Location cards (except the Tower cards) from the deck and discard them.
 - **2 green Door cards on the table**
Take one Nightmare card from the discard pile, and put it in the Limbo pile.
 - **2 blue Door cards on the table**
Take two Key cards from the deck and discard them.
 - **2 brown Door cards on the table**
Put a gained Door of your choice into the Limbo pile.
 - **2 identical Door cards on the table**
Put one of those Door cards into the Limbo pile.
 - **at least 5 Door cards on the table**
Reveal 2 Dark Premonition cards (immediately triggered if the condition is fulfilled).
 - **at least one Door card of each color on the table**
Take all Happy Dream cards from the deck and discard them.
 - **at least 3 Door cards on the table**
Discard your hand (then draw a new hand of 5 cards, as if you had just resolved a Nightmare card); then, reveal one Dark Premonition card (it is immediately triggered if its condition is fulfilled).
- A **Happy Dream** card is a Dream card.
- If drawn in phase 2, "Fill your hand", discard it then **choose 1 option below**:
 - Remove one face-up Dark Premonition card from the game, without applying its effect.
 - Reveal top 7 cards. Discard as many as you want, then put the rest back on the top of the deck in the order you choose.
 - Take from the deck 1 card of your choice, shuffle the deck and put the chosen card on top of it.
- ★ Reveal 5 or 6 Dark Premonitions at the beginning of the game for higher difficulty.

CROSSROADS AND DEAD ENDS

SET-UP

Shuffle the 16 cards of this expansion in the deck.

CHANGES TO BASIC GAME

- The **Crossroad** cards are Location cards:
 - These cards are in four colors at the same time (wild card).

- All rules that apply to Location cards apply to the Crossroad cards.
- A Crossroad card can be played as the first, second, or third card of a series of 3 cards of the same color, in order to get a Door card from the deck; the color of the two other Location cards of the series determines the color of the Door you can get.
- When drawing a Door card you can discard the Key Crossroad card to get the drawn Door card.
- **Dead End** cards are Location cards:
 - Can never be played on the table.
 - Can never be discarded "one by one": if you draw a Dead End card, you must keep it in your hand until the end of the game, unless you discard your whole hand at once (Nightmare, a Dark Premonition).
 - When you draw a Nightmare card, if the penalty you choose is to reveal the top 5 cards of the deck, the Dead End cards are considered Dream cards: they are not discarded, but are put into the Limbo pile.
- You can remove Dead End cards by triggering an **Escape**:
 - In phase 1, discard your hand and draw a new hand of 5 cards.
- ★ For higher difficulty, only play a Crossroad card as the second card of a series. It can still be discarded.

THE DOOR TO THE ONIVERSE

SET-UP

- Shuffle the 16 **Denizen** cards, and remove 8 from the game without looking at them.
- Shuffle the remaining Denizen cards and the Door card of this expansion in the deck.
 - If playing with "The Book of Steps Lost and Found" expansion, shuffle the Door to the Oniverse Goal card with the other goal cards.

VICTORY

Obtain the Door to the Oniverse card, along with the 8 Door cards of the Basic game.

CHANGES TO BASIC GAME

- The **Denizen** cards are Dream cards.
- Rules that apply to Dream cards apply to the Denizen cards, except for this rule:
 - When you draw a Denizen card (in phase 2), you must immediately decide if you want to rally this Denizen.
 - **Rallying** a Denizen:
 - Choose card from your hand, discard it in order to put the Denizen card in front of you.
 - If you do not want to (or cannot) discard to rally a Denizen card, it is discarded without effect.
 - After using a Denizen, discard it.

The Architect

Play a card that has the same symbol as the previously played card in the labyrinth row.

The Cyclobot

Trade one Location card in your hand with a Location card from the discard pile.

The Squirrel Spies

Look at the top 5 cards of the deck and put them back in the order of your choice.

The Harpoon Hunter

Reveal the top 5 cards of the deck. Discard all Nightmare card(s) among the revealed cards, and put the remaining cards under the deck in the order of your choice.

The Hammer Bird

Discard the last card played in your labyrinth row along with all the cards of the same color played immediately before it.

The Chromatic Chaos

Change the color of a Door. A Door you just drew, Door in the deck, Door in Dreamcatcher.

The Mirror

Put a Nightmare card you just drew into the Limbo pile, without resolving it. Discard the Mirror.

Repentant Treasure Keeper

Put a card from your hand under the Repentant Treasure Keeper, then fill your hand as if you had played or discarded the card. This card is not considered as a part of your hand (it is not affected by Nightmares, Dark Premonitions or Escapes), but you can still play or discard it at any time, instead of a card from your hand.

appendix THE LITTLE INCUBUS

SET-UP

- Display the Little Incubus on the table.
- Choose one of the Difficulty levels below.
 - Do not play with the Expansions.

DIFFICULTY LEVELS AVAILABLE

- **New Dreamwalker**
Once in a game, discard the Little Incubus to cancel Nightmare card effect.
- **Apprentice Dreamwalker**
At any time during the game, skip normal turn to **anticipate** a Nightmare:
 - Reveal the first card from deck. If it is a Dream or Door card, place in Limbo pile. Continue drawing until a Location card is revealed. Put this Location card under the Little Incubus, **activating** it.
 - Resolve Nightmare effect normally, if drawn.
 - Refill hand and shuffle the Limbo pile into the deck, if necessary.
 Once **activated**, you may discard card underneath to cancel the next Nightmare card effect.
- **True Dreamwalker**
Similar to the Apprentice Dreamwalker but requires 2 Location cards to activate the Little Incubus.

- **Steps**
- **Details**
- **Options**
- ★ **Variant**
